

Data Security

Updated 14 June 2020

Your data is safe with us

At Flaash.me, we are fully aware of the importance of your business's data. In many cases, your company's real value resides in the data stored with us, like your client database or invoicing data.

To guarantee the greatest possible security, we have opted from the beginning for a high quality hosting on our own servers, to guarantee a very high availability and complete security.

Data Hosting

Your data is stored on shared servers, hosted in the infrastructure of OVH, a leading European professional hosting company.

Our production facility is located in Gravelines under French jurisdiction.

Data Availability

Access to your business information is a continuing need and our job is to respond to 100%. With an average above 99.8% average availability Flaash.me perfectly meets this need.

Of course, we also make every effort to ensure technical high reactivity of the platform and we continue to invest heavily to always improve response time and scalability of the application.
